DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, and 15 –21 are drawn to a method for identifying compounds that regulate body weight in non-animal models, classified in class 435, subclass 7.1.
- II. Claims 10, 11, 13 and 14 are drawn to a method identifying compounds that regulate body weight in a test animal, classified in class 800, subclass 9.
- III. Claim 12 is drawn to a method using an animal model with genetic modification of POMC locus to regulate body weight, classified in class 800, subclass 3.

The inventions are distinct, each from the other, for reasons:

Inventions I-III are independent and distinct, each from other, because the methods are practiced with materially different starting materials and have materially different process steps.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
